

Database:
-PostgreSQL
-schema design
-ACID compliance

Data warehouse:
-Big Query
-Scalable Analytics
-Real-time data processing

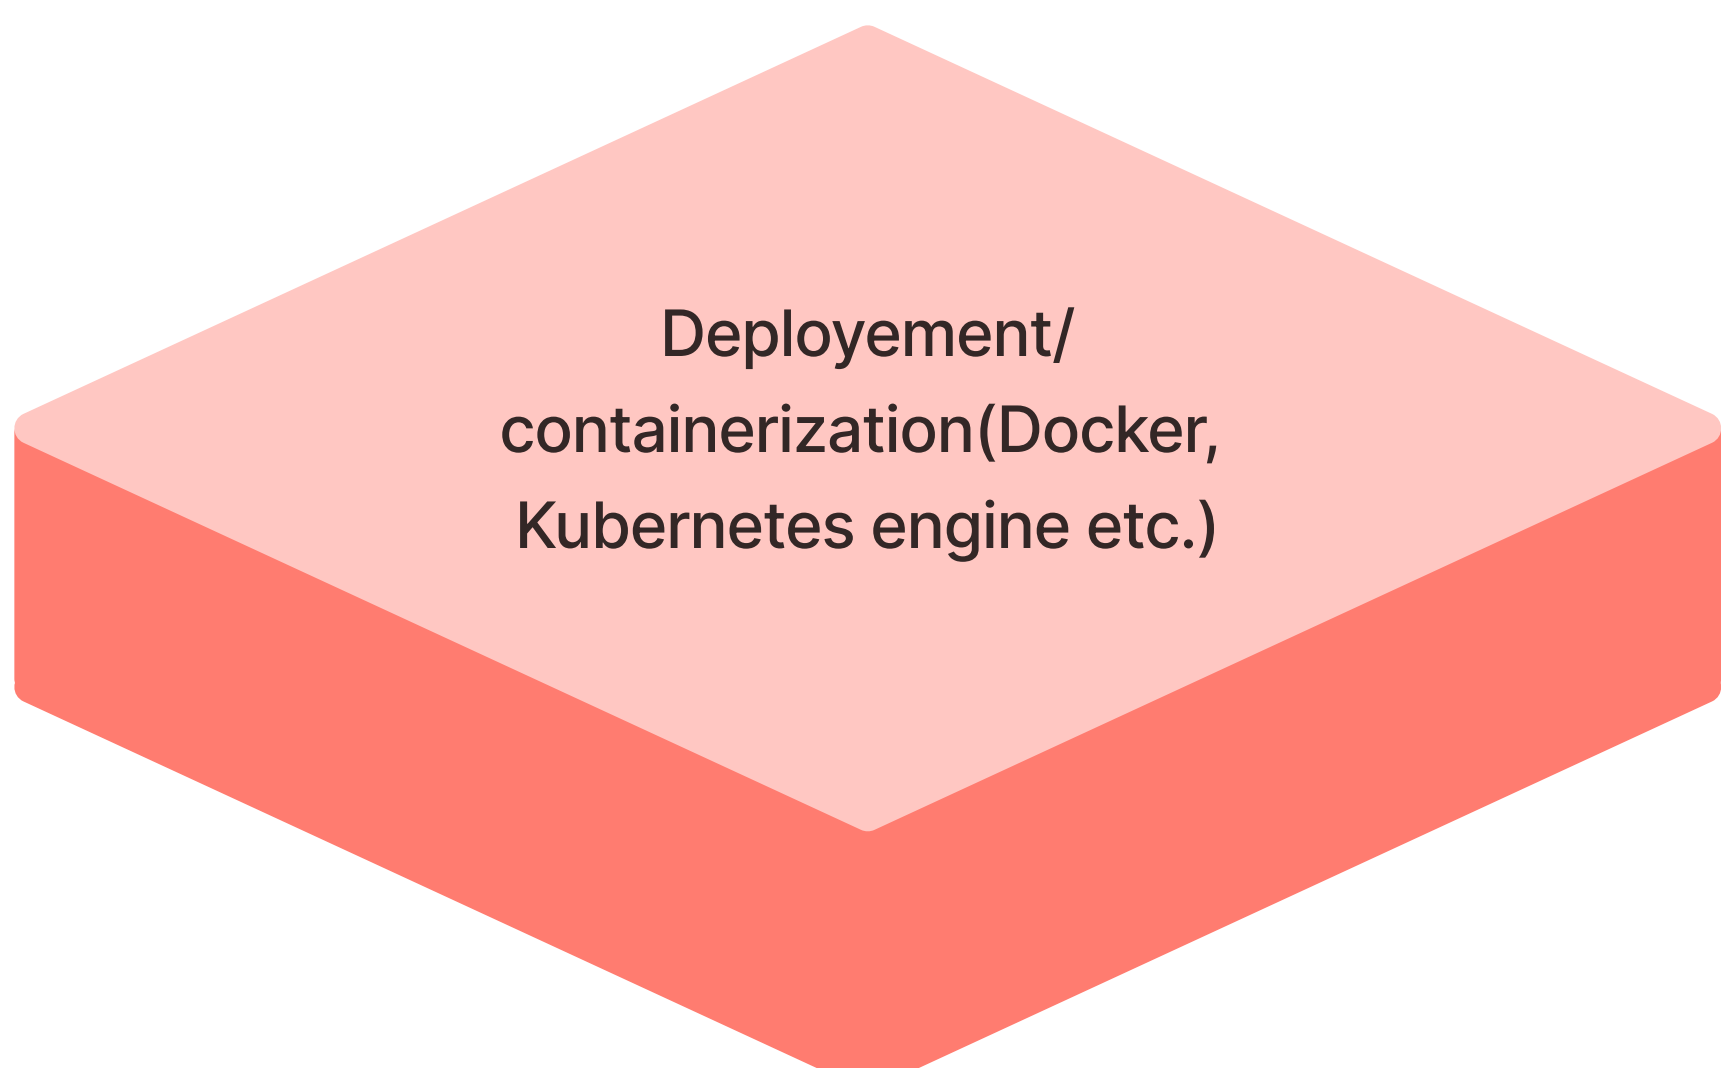

TensorFlow:
-Neural Network Architectures
-TensorBoard for Visualization

PyTorch:
-Dynamic Computational Graphs
-TorchServe for Deployment

Google Cloud:
- AI Platform for ML Models
-Cloud Storage for Data...

AWS:
-SageMaker for ML
-S3 for Data Storage
-Redshift for Analytics

Docker:
- Containerization
- Docker Compose for Orchestration

Kubernetes:
- Orchestration and Scaling
- Helm for Package Management
